**DETAILED ACTION*****Election/Restrictions***

Claims 1-21 are generic to the following disclosed patentably distinct species: 1) various antibacterial agents; 2) various vasoconstriction agents; 3) various steroidal anti-inflammatory agents; and 4) various stimulants. The species are independent or distinct because under each class of species disclosed, they are not having a common core structure and they are classified in different classes and subclasses. For example, for various steroidal anti-inflammatory agents, they can be classified into class 514, subclass 171, 178, 180, 181, 182, and 183. For different antibacterial agents, they can be classified into class 514, subclass 10-15, 255.03, 152, and 262 for example.

Applicant is required under 35 U.S.C. 121 to **elect a single disclosed species from each of the four compound classes identified above**, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1617

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
